PROFESSIONAL SUMMARY

Software Developer with 2 years of experience in web application development, specializing in modern JavaScript frameworks and frontend technologies. Proficient in React.js, Redux, Redux Toolkit, Next.js, Angular, and Node.js, with experience delivering scalable applications throughout the software development lifecycle. Skilled in application migration projects, including transitioning legacy applications from Vue.js to React.js and Angular. Strong problem-solving, communication, and collaboration skills, with the ability to work effectively both independently and within cross-functional teams to achieve business objectives.

TECHNICAL SKILLS

Languages: JavaScript, Python, C/C++, Java, SQL

Frameworks/Libraries: React.js, Next.js, Node.js, Angular, Flutter

Developer Tools: Git, Firebase, AWS

EDUCATION

Pimpri Chinchwad College of Engineering, Pune

Bachelor of Technology in Computer Science

Pune, India

Aug 2020 – May 2024

EXPERIENCE

Associate Software Engineer

Accenture

July 2024 – Present

Pune, India

- Led the end-to-end migration of a legacy Vue.js application to Next.js, ensuring feature parity, improved maintainability, and a seamless user experience.
- Designed and established the frontend project architecture, including modular folder structure, reusable components, and scalable routing configuration.
- Implemented and configured Redux Toolkit for centralized state management, enabling efficient handling of a large volume of API requests and responses across the application.
- Migrated an existing Vue.js application to Angular, setting up the application structure, routing, and state management architecture to support scalable development.
- Developed and maintained robust state management solutions in Angular to streamline API integration and data flow across multiple modules.
- Collaborated with cross-functional teams to analyze requirements, implement enhancements, and deliver high-quality software solutions.
- Participated in the complete software development lifecycle, including development, testing, deployment support, and post-release issue resolution.

Application Developer

Leazkart

July 2022 – Feb 2023

Remote

- Contributed to the development of a peer-to-peer (C2C) vehicle rental platform that enables vehicle owners to rent their vehicles directly to customers.
- Built cross-platform mobile application features using Flutter, ensuring a responsive and seamless user experience.
- Integrated Firebase services for user authentication, real-time messaging, and data synchronization.
- Developed and consumed REST APIs using Node.js and MongoDB to manage users, vehicles, bookings, and application workflows.
- Utilized Docker for containerized development and deployment, improving consistency across development environments.
- Collaborated with stakeholders to gather requirements, implement new features, troubleshoot issues, and deliver enhancements.

PROJECTS

Iris Liveness Detection | *Python, Keras, OpenCV, React.js*

- Researched and developed an iris recognition system for biometric identification using image processing and machine learning techniques.
- Explored and implemented feature extraction methods, including Otsu Thresholding and Thepade's Sorted Block Truncation Coding (TSBTC), to enhance iris pattern recognition
- Achieved an overall recognition accuracy of 96% through optimization of feature extraction and classification techniques.
- Developed a React.js web application for real-time iris detection and recognition with an interactive user interface.

LEADERSHIP & COMMUNITY ENGAGEMENT

- Conducted a 7-day "Flutter Frenzy" workshop, introducing students to Flutter and cross-platform mobile application development through hands-on coding sessions and practical demonstrations.
- Co-organized and delivered "Ctrl+Shift+Web", a beginner-friendly web development workshop in collaboration with VScholar and BVICAM (New Delhi), covering HTML, CSS, JavaScript, and modern web development concepts.
- Conducted a 2-day web development workshop for college students, sharing industry insights, development workflows, and career guidance in modern software engineering.
- Delivered technical presentations and training sessions, helping beginners build foundational skills in web and mobile application development.
